LABORATORY GLASS

LABORATORY GLASS

Whether it is glass instruments and laboratory items as standard components or as customer-specific tailor-made products, we supply customers worldwide and more than 350 satisfied regular customers testify to the fact that we work in accordance with the objective of customer satisfaction.

GLASS COMPONENTS FOR ELECTRICAL ENGINEERING

As the leading manufacturer of glass components for X-ray tubes and photo-multipliers world-wide, we produce precision parts in a fully automated manner on PLC controlled glass lathes. Strict quality requirements demand permanent monitoring of the individual production stages as well as 100 percent control within the entire production line. We count renowned companies, such as e.g. Philips and Siemens, among our customers.

SPECIAL COMPONENTS FOR INDUSTRIES AND RESEARCH

Metal and ceramics do not always form the suitable material. In these cases, glass frequently offers many „very transparent“ advantages. Hot forming and grinding form our day-to-day work and are carried out with precision in the to millimetre range..

SPECIAL PROFILE TUBE

From round standard to precision profiles

Since as a standard glass tubes are only available as round tubes, this led us to develop a procedure by means of which we can produce almost any geometric shape of glass tube profiles. In this context, the question of which type of glass the basic consists of does not play any role. Wall thickness, radiuses and edge lengths can

be designed flexibly in accordance with the customer's requirements and, hence, we can provide a solution for almost any application. On account of the costs of the mould and of the set-up costs which are low compared with other production methods, small series and samples can also be produced cost-effectively. Further processing of standard lengths is possible accordance with your requirements.

Please take the following aspects into consideration when issuing enquiries regarding glass profiles:

- **Type of glass**
- **Outside dimensions**
- **Inside dimensions**
- **Wall thickness**

**Precision is our company's philosophy.
Top quality is the result**

PARTNER OF TRADE AND INDUSTRIES

For more than five decades the company of Hofmann Glastechnik GmbH has been your reliable partner in the field of glass for laboratories, medicine and industries. As one of the biggest industrial glass blower companies in the German-speaking region, we offer customers a broad range of glass components and production technologies.

THE DEMAND WE PUT TO OURSELVES: INNOVATIVE POWER AND QUALITY WITHOUT ANY COMPROMISES!

Our range of offers is closely oriented on the requirements of the market and is characterized by reliable quality. The high demands we put to ourselves contribute to this just as much as permanent quality inspections and optimisation measures. Moreover, we can offer our customers a real added value through tailor-made special solutions. You can look forward to our competent staff, thorough counselling and reliable service.
